SF32+T is a bullet shaped gripper with a U-joint, permitting installations at difficult angles. The SF32+T has a female thread so that it can be fastened to a 3/8-16 threaded stud or hanger bolt. SF32+T can also be used in combination with the 32W bushing with round plate, or the 60W bushing with rectangular plate to attach the part to wood ceilings, rafters and the like. A side exit for the cable allows for adjustability in the cable length during installation.

Installation

Attach to 3/8-16 anchor with all-thread stud for concrete, or use a hanger bolt for wood blocking. Another option is to use Arakawa 32W or 60W mounting plates (purchased separately) with #8 pan head screws.
